

# SUSTAINABILITY POLICY

Euroquartz is committed to a business model of sustainability and the following form the three core elements of our Policy. They commit us to consider the wellbeing of not only global environmental concerns but also people, animal ecosystems and the direct or indirect economic impacts of our operations.

- All waste materials including paper and cardboard are to be recycled. Cardboard packaging from customer orders is re-used to minimise single use.
- We communicate, invoice, bank and store documents electronically and only print when necessary.
- All chemical waste, glass, ink cartridges and batteries are to be disposed of via licenced agencies / carriers.
- A commitment to Zero carbon options when procuring our energy for our day-to-day operations.
- Reducing Water and energy usage within the business is an ongoing process. Lights and equipment are switched off when not required and heating controls accurately set to reduce economic impact.
- A sustainable procurement policy is in place with all suppliers. Commitment to ethical and environmental requirements laid out in our Supplier Quality Contract Requirements document is mandatory.
- Good working practices and adherence to good HR practices are in place.
- We encourage sustainable travel choices by travelling to industry events by vehicle sharing to minimise the number of journeys required.
- We sign up to green / sustainable initiatives from our courier contacts to help develop the infrastructure required for a long-term sustainable future.
- Compliance with all legislation and good governance is practiced.

Achieving our aims and objectives will be monitored by scheduled review and audit process using our accredited quality management system.
